OUR IDEAS. YOUR HOME.

Decisions, decisions, decisions.
We understand everyone is
different. That's why we
feature so many products
and designs in this brochure.
So you can find one that's
just right for you.
Our ideas. Your home.

The kitchen. The heart of any home. Where the best parties end up
and where the world is put to rights over a perfect roast. It's why
we create appliances that fit seamlessly into your life. Beauty and
brilliance, technology and style. Browse our freestanding collection
of stylish cooking, dishwashing, laundry and refrigeration appliances.
We've got something to suit every taste, space and vision.

www.hotpoint.ie

www.hotpoint.co.uk

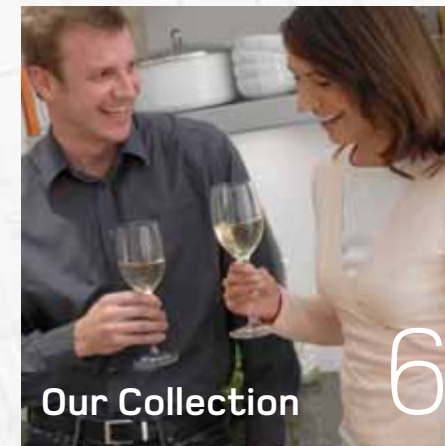

Superbrand. Trusted Brand.
An award winning brand.
Good to know we look as good
on paper, as we do in your kitchen.
Our ideas. Your home.

A century might be up since we started making appliances, but you can be certain that Hotpoint isn't resting on its laurels. We have a hard-earned reputation to build on – putting innovative design, advanced technology and our own evolving style into millions of homes. Being the best in our field for reliability, quality and distinction, will always be our goal. It's given us an award winning status that many aspire to.

In many ways, our success has grown from staying close to our values at the heart of our brand... Intelligence, Comfort and Style. It's easy to see why we have been voted 'Britain's Most Trusted Brand of kitchen appliance' for the 10th year running.*

Our Eco Tech appliances
won't change the world,
but if we all do our bit,
we can make a difference.

Our ideas. Your home.

High performance, low energy. It's good to stand for something. Especially when it could help save precious resources. If you see the Eco Tech icon on our appliances, you'll know you're getting the very best energy rating or that they have specific Eco features that will help save energy at home, such as the versatile Eco Cycles on our washing machines.

To keep up with our fast-changing world, we aim to develop advanced technological solutions every year. These not only comply with strict environmental legislation but also make our products even more eco-compatible. Some of our appliances are also recommended by the Energy Saving Trust so look out for the Energy Saving Recommended logo on our appliances too!

Your ideal kitchen partner...
Our Intelligent Cooking System
features pre-set functions
to help you achieve great
results every time.
Our ideas. Your home.

Ever wanted a top chef to give you their professional help and expertise? We've developed the next best thing... an easy to use feature that manages everything for you. From optimising oven elements, to recommending shelf position, temperature and cooking time. With the Intelligent Cooking System you can be confident that even the most ambitious dish will turn out beautifully.

Plus, if you want complete control, simply use one of our standard functions – **fan** or **conventional oven** instead of the incredible Intelligent Cooking System.

Intelligent Cooking System

Imagine the aroma of freshly baked bread, the succulence of roasted meats or the lightest sponge cakes that more than rise to the occasion – all cooked to perfection at the touch of a button. Simply choose one of the two unique Intelligent Cooking programmes:

One Touch – with 3 automatic cooking functions

Whether you're cooking fresh bread or a Victoria sponge, One Touch automatically sets the correct temperature and time dependent on what you are cooking to ensure perfect results.

Cake Cycle

Sets the time and temperature for baking perfect sponge based cakes.

Bread Cycle

Sets the optimum time and temperature for baking bread.

Rising

Heats and holds the oven at 40°C – perfect for proving bread.

Smart Chef – with 3 adjustable cooking functions

Cooking has never been simpler! Smart Chef provides the optimum conditions for roasting all types of meats and delicate fish. The oven elements and temperature are able to fluctuate throughout the cooking period until the food is cooked just the way you like it.

Roast Meat

A profile programme specially designed for roasting meats.

Roast Chicken

A profile programme designed for the perfect roast chicken.

Fish

Gentle top and rear heat to lightly poach fish.

The Intelligent Cooking System is only available on Ultima HUE62

Intelligent Solutions

Perfectly cooked cakes at the touch of a button!

With the **Intelligent Cooking System's Cake Cycle** you can sit back and relax whilst the oven does all the hard work for you! As the oven sets and optimises cooking conditions, you will be amazed when your cake rises and cooks to perfection without you having to set the time or temperature!

Don't forget to also take a look at the other Intelligent Cooking System programmes.

For information on all our other cooking features please see pages 36–39

Cooking

Which is the right cooker for me?

Do you want a stylish cooker packed with the latest features?

Look no further than our 90cm wide Ultima Range Cookers. They have everything you need to create a style statement in the kitchen. Equipped with the latest must-haves, such as triple ring wok burners for perfect all round heat distribution!

ULTIMA Range

18

Do you crave ultimate performance and control in a cooker that also looks great?

Our Ultima 60cm wide cookers host a collection of really useful features like programmable timers and our unique Intelligent Cooking System on specific models. All the main ovens are A energy rated so you can be sure of optimum performance and eco efficiency every day.

ULTIMA 60cm

20

Do you have slightly less space but still want a stylish cooker with all the features you need?

Our Ultima 50cm wide models fit perfectly in those smaller spaces, while offering a collection of intelligent, useful features combined with stylish design.

ULTIMA 50cm

24

Are you after a simple and easy to use cooker that still adds the finishing touch to your kitchen?

Giving you everything you need to cook your favourite dish, our 50cm and 60cm collection of cookers are easy to use and offer useful features such as variable grills and stay clean catalytic liners for easier cleaning.

50cm & 60cm Collection

28

ULTIMA 90cm Range Cookers

Designed to make cooking even more pleasurable, our 90cm range cookers are packed full of great features.

Our ideas. Your home.

At 90cm wide with a choice of styles and oven options, not to mention useful features such as our wok burners for the ultimate stir-fry, our range cookers will create a stunning focal point in your kitchen.

EG902G

Dimensions: H 900 x W 600 x D 600 (mm)
Colours: Stainless Steel (X), Black (K), Graphite (G), Polar White (P)

Chicken with Chorizo and Parma Ham

4 small chicken breasts
2 small chorizo sausages
4 slices parma ham
1 clove garlic
Olive oil
Salt & pepper

Make an incision under the breast being careful not to cut all the way through.

Turn your knife sideways and gently cut through the flesh to make a little pocket, repeat with your knife the other way.

Slice the chorizo and place inside the pockets, folding back the chicken to hide the chorizo.

Wrap the breasts in the parma ham and then in cling film and then in foil.

Crush the garlic and add a little olive oil.

Cook the chicken in a hot oven for 15 minutes, turning occasionally.

Remove foil and film, brush with the garlic butter and gently fry in a non-stick pan until golden brown. Serve with a nice green salad.

SERVES 4

ULTIMA 50cm Cookers

If you're not big on space, but you still want performance, our 50cm Ultima cookers could be the perfect fit.

Our ideas. Your home.

Packed with useful features such as stay clean catalytic liners, variable grills and height adjustable feet, our 50cm Ultima cooking range will easily fit into your life. Available in a choice of Stainless Steel, Black, Graphite and Polar White, they'll complement both modern and traditional kitchen designs.

Intelligent Solutions

Save time and energy with Circulaire Fan Cooking.

Many of our electric cookers feature the Circulaire Fan system. It saves up to 10 minutes per hour in cooking time and allows you to set the temperature of the oven up to 20 degrees below a standard conventional oven. How does it work? Surrounding the fan is a heating element which circulates hot air to create an even temperature throughout, saving you time and energy.

Perfect Lazy Afternoon-Sweet Lemon Tartlets

Sweet pastry

450g sieved plain white flour
1 cup caster sugar
250g grated unsalted butter
½ teaspoon vanilla extract
1 medium egg beaten

Rub together flour, sugar & butter until it forms a bread crumb like texture. Slowly add beaten egg and vanilla until mixture binds together. Form into a ball, cover in cling film and put in fridge to rest for 1 hour. Dust with flour then roll out and line individual tart cases evenly with sweet pastry. Blind bake in top part of oven for 15 minutes on 150°C.

Filling

¾ cup caster sugar
3 large eggs
45g unsalted butter
1/6 cup of cream
Zest of 3 lemons
½ cup of freshly squeezed lemon juice

Put all ingredients together in heavy bottom pan, on medium heat stirring continuously with a whisk, slowly bring to a simmer. Continue stirring until mixture thickens – just be very careful eggs do not scramble. Take off heat and pass through a sieve. Fill pastry cases and bake in the oven for 10 minutes on 150°C. When cooked allow to sit for 5 minutes then take out of tins and allow to cool on wire rack. With hand held propane burner lightly toast centre of each tart to give a golden crust, or decorate with fresh fruit.

MAKES 12 TARTLETS

50cm and 60cm Collection

Giving you even more choice, our 50cm and 60cm Collection of cookers are available in a wide range of colours.

Our ideas. Your home.

Whatever your cooking style or kitchen, we have something to suit everyone. Choose between electric or gas as a double oven, or twin cavity cooker. All hosting intelligent, useful features to help you every day.

Splashback Range

Key Features

Available in:
BSS90 - 90cm Wide
BSS60 - 60cm Wide

Finish: Stainless Steel (X)

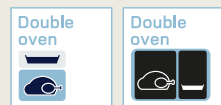

Key features explained...

Choose from a range of cavity styles:

Double Oven Cooker

These cookers have two separate ovens and a grill. This gives you the best of both worlds, with greater oven flexibility and capacity meaning you can cook and grill at the same time.

Twin Cavity Cooker

A cooker with an oven on the bottom and a separate cavity at the top that features a grill. This means you can grill and cook at the same time, or use the top cavity to keep food warm.

Single Cavity

Allow our single cavity oven to take care of your cooking creations. The extra large oven features a combined grill giving you maximum cooking space.

Save energy with our flexible Grills:

Solarplus Grill

Heats up rapidly, reaching full heat in just 15 seconds. The speed of the grill means the food stays moist as more efficient cooking helps prevent food from drying out. It's 20% more efficient than a conventional grill too and offers variable heat control plus a twin grill option.

Twin Grilling

You can choose to use the grill on full width or use just half the grill if you're grilling a small amount, which will help to save energy. With variable temperatures too, this makes the grill versatile and economic to use.

Expert features on our Hobs:

Ceramic Hobs

Efficient, easy to clean, they offer fast and responsive heat, saving you time cooking and cleaning.

Gas Hobs

For control and precision, a gas hob is great for giving instant, adjustable heat. Our gas hobs feature a range of burner styles, such as simmers and wok burners.

Wok Burner

Ideal for stir-frying, this high speed gas burner distributes heat evenly around the base of the wok for fast, efficient and perfectly cooked dishes.

Precision Control

Precision control on some ceramic hobs allows a greater degree of temperature choice by offering even more flexibility when selecting a heat setting.

Solarglo Zone

Faster and more responsive heat than standard ceramic hobs – typical time to full heat is up to 5 seconds. The zones are also protected from overheating as they include a thermal limiter.

Solarglo Dual Zone

The dual circular design increases cooking flexibility since the hob can be used as a single or double zone, accommodating small and large pan sizes.

Solarglo Multi Zone

The multi zone design increases cooking flexibility since the hob can be used as a single zone, a double zone which can accommodate large pan sizes, or a triple zone to accommodate fish kettles or griddles.

Solid Plate Hobs

Offering a more traditional style of cooking, our solid plate hobs feature zones that heat up faster than standard solid plates. They also retain residual heat meaning they stay hotter for longer so they are great for simmering.

Safety Cut-Out

Our cookers with glass lids are fitted with a Safety Cut-Out. This cuts off the supply of gas if you accidentally close the glass lid with the burners still switched on.

Hob Hot Indicators

A valuable safety feature on all ceramic hobs. If the surface of the ceramic hob is still hot the indicators will light up, even after you have turned off the controls.

Key features explained...

Electric & Gas Oven Functions:

Multifunction Cooking

Choose from a variety of cooking functions in the main and secondary ovens:

8 Functions: Fan Assisted, Fan, Conventional, Bottom Heat, Grill, Half Grill, Fan Grill, Quick Defrost

7 Functions: Fan, Conventional, Baking, Grill, Half Grill, Fan Grill, Pizza

4 Functions: Conventional, Bottom Heat, Grill, Half Grill

Circulaire Fan Cooking

The fan has a heating element surrounding it to circulate hot air and create an even temperature throughout. It saves up to 10 minutes per hour in cooking time and you can set the temperature up to 20°C below a standard conventional oven and still achieve the same results, saving energy.

Zoned Gas Oven

Our gas ovens offer different temperature zones. These zones allow a number of different dishes to be cooked at the same time. The centre shelf position maintains the selected temperature, while the shelf positions above are a gas mark higher and the shelf positions below are a gas mark lower.

Other features...

Cool Touch Door

For extra safety in the kitchen our triple glazed Cool Touch oven doors ensure the outer temperature of the door is cooler to the touch.

Flame Supervision Device

A Flame Supervision Device, (also known as Flame Failure Device) is fitted to all gas and dual fuel cookers and is part of the gas burner system. It detects if the flame is accidentally extinguished and automatically cuts off the gas supply.

LPG

If your home uses liquid petroleum gas (LPG) rather than a mains gas supply, then we have a great range of LPG and LPG convertible cookers in a choice of widths and colours.

Easy to Clean

The ergonomic design of our ceramic hobs ensure they are easy to wipe clean, whilst our easily removable inner door glass and Stay Clean Catalytic Oven liners give you a helping hand to ensure keeping your cooker looking good is a whole lot easier.

Programmable Electronic Timer

Start and stop the oven automatically at a time that suits you with the easy to use 3 button timer. A handy minute minder and clock is also included.

Adjustable Feet

Our useful height adjustable feet on all our freestanding cookers help you to ensure you can set your cooker at the right height for use. They also ensure you can position your cooker so it sits perfectly in line with your worktop.

A Energy

All our Ultima 60cm and 50cm electric main ovens are A energy rated and on selected models both the main and secondary ovens are A energy rated too.

Eco Tech

Our Eco Tech icon is awarded to those cookers with the very best energy rating where both ovens are A energy rated.

Automatic Ignition

For easy operation, the control knob has a push and turn action which ignites the burner using just one hand. The push action also acts as a safety device that prevents the gas being turned on accidentally. Its design is also stylish and helps to make the control panel easier to clean.

Stay Clean Catalytic Oven Liners

Catalytic agents work with the heat of the oven to break down grease and excess fats leaving you with more time to cook rather than clean.

Hood Installation Guides

†Flame Supervision Devices
A flame supervision device is part of the gas burner system and detects if the flame is extinguished and cuts off the gas supply. Regulations state that all gas and dual fuel cooking appliances for use in flats and other multi-dwelling buildings in the UK cannot be installed unless they contain Flame Supervision Devices. This includes buildings that include a number of individual dwellings for domestic purposes only together with dual-purpose properties such as flats above shops and offices. It does not include properties that are for commercial use only or detached, semi-detached, terraced houses and houses with loft conversions.
Please note that Flame Supervision Devices are a legal requirement on cookers for use in the Republic of Ireland.

♦ LPG Conversion kits are available free of charge as a spare part through the Hotpoint Spares National Call Number.

All Polar White Cookers have Polar White side panels. Black and Graphite Cookers have Black side panels. Stainless Steel Cookers have Black side panels.

- Additional oven shelves are available as optional extras for all models. These can be obtained by ringing the Hotpoint Spares National Call Number 08448 22 52 25 (Please call 0818 31 34 13 if calling within the Republic of Ireland)
- Please follow the specifications for installation supplied with the product or ring the Service National Call Number 08448 22 42 24 (Please call 0818 31 34 13 if calling within the Republic of Ireland) for information
- All dual fuel and gas appliances must be installed and maintained by a Gas Safe registered engineer (within the UK) or R.G.I.I registered person (within the Republic of Ireland). Hotpoint offer this service. Electrical appliances should be installed by a qualified electrician.

If a hood with a chimney is mounted on an external wall or into a ceiling cavity, then extraction mode is appropriate. If the hood is mounted on an internal wall, then recirculation mode is likely to be more appropriate, otherwise the ducting could be visible. For more information please call 08448 22 52 25 or 0818 31 34 13 if calling within the Republic of Ireland.

Laundry

Wash, Dry, Wash and Dry... Whatever your laundry needs we will have a product designed perfectly for you. Choose from our Aqualtis, Ultima, Aquarius+ or Aquarius collections.

It's got to be **AQUALTIS**
...but which Aqualtis?

With their distinctive style, the Aqualtis family of products offer maximum technical performance and ease of use, whilst still looking great in the kitchen.

Across Aqualtis **washing machines, washer dryers** and **tumble dryers** you will find a range of specialist washing and drying features designed to enhance your laundry experience and meet all your laundry needs.

Aqualtis Washing Machines

A stylish design packed with intelligent features such as **Steam Refresh** and **Steam Hygiene** combined with a large **9kg** capacity, means doing the laundry becomes less of a chore.

54

Aqualtis Washer Dryers

With an A energy rating and the capacity to **wash and dry a huge 6kg load in one uninterrupted cycle**, doing the laundry has never been easier or more efficient... especially with our **1 Hour Wash & Dry Ready to Wear Cycle!**

72

Aqualtis Tumble Dryers

With a large 8kg load capacity, **7 timed drying options** and a variety of specialised drying programmes such as **Set and Forget Sensor Drying** and our **Jeans programme**, tumble drying has never been easier.

82

Cleaner and fresher...
We're introducing the natural
power of steam to your laundry.
Our ideas. Your home.

Aqualtis washing machines and washer
dryers now offer two steam functions –
Steam Refresh and **Steam Hygiene** Option.

Giving you total convenience and
flexibility the steam penetrates the
drum and reaches the laundry quickly
and efficiently, rapidly getting to work
to give you the best possible results.

Both our steam functions only use
200ml of water to generate the steam
required. So if you're conscious about
your water consumption, Steam Refresh
is a great alternative to a fast wash.

Steam Refresh

The Steam Refresh cycle is a short 20 minute
programme which uses only steam (no detergent
or fabric softener required) to help remove odours
such as smoke or food smells or to freshen up
garments that have only been worn a few hours.

Steam Hygiene Option

The Steam Hygiene Option activates an additional
period of steam action at the end of a normal
wash cycle* to ensure a deep and thorough cleanse
with the added reassurance of the antibacterial
effect of steam ensuring all allergens are
removed – ideal if you have sensitive skin.

*Compatible with White and Coloured Cotton washes,
Baby Cycle, Synthetics Cycle, Bed & Bath

Look out for the Steam icon throughout the
brochure on products that feature both the
Steam Refresh and **Steam Hygiene** Option.

Intelligent Solutions

How does Steam work?

An innovative titanium heating element
creates perfect steam molecules which
penetrate and relax laundry fibres. The
density of steam is much less than that
of water, ensuring total hygiene in the
most natural, economic and gentle way.

For information on all our other laundry features please see pages 68 & 69, 78 & 79 and 90 & 91.

We've created energy saving eco appliances that promise outstanding results every time. Our ideas. Your home.

If you're mindful of your environmental impact, but don't want to sacrifice exceptional washing results, take a look at our Eco Cycles and Eco Wash Function. They not only give you great cleaning, they can save you around 50% to 70% in energy* too.

You'll find our energy saving Eco Cycles or Eco Wash Function across our full range of washing machines and Aqualtis washer dryers. Developed in partnership with Ariel, you can now get great cleaning even at low temperatures thanks to our advancement in washing technology together with the cleaning power of Ariel.

Eco Cycles

Our 3 unique Eco Cycles include: Cottons, Synthetics and a Fast Wash. Choosing the Eco Cycles will help you save around 50% to 70% in energy*... definitely worth considering for your daily washing.

Cottons

For everyday cleaning needs for cotton or linen items.

Synthetics

Designed to wash a variety of man made fibre mixtures.

Fast Wash

A fast cycle for everyday mixed fabrics that need a freshen up or are only slightly dirty, in just 30 minutes.

Eco Wash Function

A slightly different way of achieving the 50% to 70% energy* savings of the Eco Cycles on Ultima and Aqualtis washing machines and Aqualtis washer dryers. Selecting the Eco Wash Function option automatically modifies the Cotton, Synthetic and Fast Wash cycles to give you the same great results.

Eco Feedback

Our Eco LED Indicator on our Aqualtis washing machines and washer dryers will light up to let you know when your programme selections are saving you energy – whether you choose to use our specific Eco Wash Function or modify the temperature or spin speed of your selected cycle yourself allowing you energy savings of up to 10% or more.

Intelligent Solutions

Choose a laundry model with our Eco Cycles or Eco Wash Function to save around 50% to 70% in energy!*

Keep your eyes peeled throughout the laundry section for the Eco leaf icon which highlights models with the Eco Cycles or Eco Wash Function, helping to save you money and help the environment.

Also make sure you look out for the Eco Tech icon throughout the brochure which highlights those models which we believe will give you high performance combined with low energy usage.

*Energy savings are up to 50% for Eco Cotton cycle, up to 68% for Eco Synthetic cycle and up to 70% for Eco Fast Wash cycle (all compared to equivalent 30°C cycle).

*Energy savings are up to 50% for Eco Cotton cycle, up to 68% for Eco Synthetic cycle and up to 70% for Eco Fast Wash cycle (all compared to equivalent 30°C cycle).

For information on all our other laundry features please see pages 68 & 69, 78 & 79 and 90 & 91.

Washing Machines

Which is the right washing machine for me?

Do you want a stylish machine with a massive capacity, packed with all the latest features?

Our Aqualtis washing machines offer you a huge 9kg capacity, a choice of interface designs and specialist features including Steam Refresh and Steam Hygiene. Selected models also feature the latest Auto Dose System technology.

AQUALTIS

54

Are you looking for large capacity combined with the latest LCD display?

Our Ultima models are perfect for those with an eye for style and the need to be kept in the picture. Our Ultima models feature a large 8kg capacity and a stunning, interactive LCD display that tells you everything you need to know at a glance.

ULTIMA

60

Do you want complete control at the touch of a button?

With a large 7kg capacity and digital display including Time to End, our Aquarius+ models will give you easy access to a range of special cycles, such as Baby and Eco.

AQUARIUS⁺

62

Need a simple and easy to use machine ideal for smaller households?

With a 6kg capacity, our Aquarius models are ideal for couples, or smaller households. Available with LED displays and all the basic programmes you need, including our energy saving Eco Cycles.

AQUARIUS

64

AQUALTIS

A firm family favourite, the Aqualtis offers a massive 9kg load capacity neatly wrapped up in a stylish design. Our ideas. Your home.

Packed with all the latest features such as Steam Refresh, Steam Hygiene and the latest Auto Dose technology on selected models. The Aqualtis will take the utmost care of your family's clothes whilst also looking great in your kitchen. Choose from various colour options and display styles.

Auto Dose System
Washing Machines
56

Steam Washing
Machines
58

AQUALTIS

Auto Dose System Washing Machines

Intelligent Solutions

Automatic dosing at your fingertips with the Auto Dose System...

Storing up to 5.5 litres of liquid detergent and 3.5 litres of fabric softener, once filled, you simply then select how dirty your laundry is and the level of freshness required and the machine will do the rest, dispensing the correct dosage of detergent and softener into the wash at the appropriate time.

Icons on the machine's display panel will also tell you when the two tanks are nearly empty and with an automatic cleaning programme they will remain in perfect working order.

Depending on your individual laundry needs, the storage tanks can provide automatic dosing for up to 40 wash cycles*.

*Under normal conditions of usage and washing.

Intelligent
Solutions

Helping you to save energy

Don't forget you can save around 50% to 70% in energy* with our Eco Cycles or Eco Wash Function, available on all Hotpoint washing machines and Aqualtis washer dryers... now that's what we call energy saving!

*Energy savings are up to 50% for Eco Cotton cycle, up to 68% for Eco Synthetic cycle and up to 70% for Eco Fast Wash cycle (all compared to equivalent 30°C cycle).

Key features explained...

Woolmark Platinum Care

All our Hotpoint washing machines feature this special programme endorsed by Woolmark*, the world's leading authority on all wool items. Extra gentle agitation and low spin speeds help to eliminate any friction between the fibres of wool garments, thereby ensuring a perfect wash.

*In the UK and Eire the Woolmark is a Certification Trade Mark

Bed & Bath Cycle

Available on our large capacity 8kg and 9kg washing machines, this programme has been specially designed to wash bulky loads of bedding and towels efficiently in just under two hours, with great cleaning performance.

Super Silent Wash

A Hotpoint Super Silent washing machine is equipped with a specialised motor which dramatically reduces noise levels during the wash cycle, so that you'll hardly know it's working.

Baby Cycle

Let Hotpoint help look after your little one's clothes. Our Baby Cycle has been specially designed to tackle the toughest of stains typically associated with babies and young toddlers, including baby food, fruit yoghurt, mud and grease, giving visibly better results when compared to using a standard 40°C cotton wash cycle.

Shirts Cycle

A cycle designed to wash shirts with care and, thanks to special programming, ensures that creasing is reduced to make ironing easier.

Eco Tech

Our Eco Tech icon is awarded to those washing machines that have either an A+ energy rating or feature our Eco Cycles or Eco Wash function for ultimate energy savings.

Energy Saving Recommended

Look out for the Energy Saving Recommended logo on those models recommended by the Energy Saving Trust. Only washing machines that comply with the Energy Saving Trust's most stringent criteria are endorsed.

Washer Dryers

Which is the right washer dryer for me?

Want the convenience of two technologies in one machine with a huge wash and dry load capacity?

Our Aqualtis washer dryers are A energy rated, have a huge 8kg wash load capacity and can wash and dry a large 6kg load in one cycle. The Aqualtis washer dryers also host specialist features such as Steam and Eco Wash Function.

AQUALTIS

72

Do you want an interactive LCD display creating a style statement in the kitchen?

Our Ultima washer dryer with LCD display looks simply stunning. Available in a range of colours, the Ultima has a large 7kg wash load capacity and can wash and dry a large 5kg load in one cycle. It also features a specialist motor to ensure the washing process is super silent.

ULTIMA

76

Are you after complete control with our digital display?

With a large 7kg capacity, B energy rating and digital display including Time to End, our Aquarius+ models will make laundry easier with everything you need at the touch of a button – including useful features like Ready to Wear and Baby Cycle.

AQUARIUS⁺

76

Do you want an easy to use washer dryer with everything you need?

Providing all the basic programmes you need including energy saving Set and Forget Sensor Drying, our Aquarius model will make washing and drying your clothes a pleasure, not a chore.

Intelligent Solutions

Freshen up with the natural power of Steam. Our **Steam Refresh** and **Steam Hygiene Option** achieve ultimate cleaning and performance.

Steam Refresh – A quick 20 minute programme which uses only steam to freshen garments worn for just a few hours.

Steam Hygiene Option – An additional period of steam at the end of a normal cycle ensures a deep and thorough antibacterial cleanse.

Key features explained...

6+6kg Wash and Dry Load

Our Aqualtis washer dryers have a huge 8kg wash load, which gives them the capacity to wash and dry a 6kg load in a single uninterrupted cycle.

Wash and dry load
6+6kg

5+5kg Wash and Dry Load

Our Ultima, Aquarius+ and Aquarius washer dryers have a large 7kg wash load, with the capacity to wash and dry a 5kg load in a single uninterrupted cycle.

Wash and dry load
5+5kg

Ready to Wear Cycle

This extra fast programme has been designed to **wash and dry** a small load of lightly soiled garments in just **60 minutes**, making it perfect for refreshing an outfit the same day or night you need it...or even an urgent school uniform wash.

Set and Forget Sensor Drying

Our Set and Forget drying system uses sensors to monitor the moisture and temperature levels inside the drum of the machine, so that based on the choice of drying level you make (Iron, Hanger, Cupboard or Extra Dry), the machine senses when the load is dry. Not only convenient for you, sensor drying ensures maximum energy efficiency, by ensuring that the machine stops when the clothes reach the drying level selected.

Iron Dry

This drying setting leaves a level of moisture within the clothes, helping to make the ironing easier, which is particularly useful for garments such as shirts.

Hanger Dry

This medium drying level is ideal for garments which don't need to be ironed and can simply be placed on a hanger to finish drying.

Cupboard Dry

The drying programme will end when the sensors detect very little moisture inside the drum, meaning the garments are almost completely dry and ready to put away.

Extra Dry

This level of sensor drying ensures the garments are completely dry and can be worn immediately.

Please note, Two, Three or Four Level Set and Forget Sensor Drying is available depending upon your choice of machine.

Eco Tech

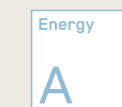

Our Eco Tech icon highlights those washer dryers with an A energy rating or specialist Eco features such as the Eco Wash Function like on all our Aqualtis washer dryers that save around 50% to 70% in energy* by automatically modifying the Cotton, Synthetic or Fast Wash cycles.

*Energy savings are up to 50% for Eco Cotton cycle, up to 68% for Eco Synthetic cycle and up to 70% for Eco Fast Wash cycle (all compared to equivalent 30°C cycle).

A Energy

All our Aqualtis Washer Dryers incorporate the latest technology to reach our highest energy rating possible.

Super Wash

This option adds an extra boost to the cycle to offer a high-performance wash designed to deal with the most difficult types of dirt.

Woolmark Platinum Care

All our Hotpoint washer dryers feature this special wash programme endorsed by Woolmark*, the world's leading authority on all wool items. Extra gentle agitation and low spin speeds help to eliminate any friction between the fibres to help keep your clothes in great condition.

*In the UK and Eire the Woolmark is a Certification Trade Mark

Tumble Dryers

Which is the right tumble dryer for me?

Do you want a large 8kg capacity, B energy rated condenser dryer that gives perfect results?

Our Aqualtis tumble dryer will more than fit the bill. It also comes with additional features including a Jeans Programme, Refresh Programme and Baby Programme.

AQUALTIS

82

Are you after an 8kg capacity condenser dryer with an interactive LCD display?

Our Ultima tumble dryer hosts an array of useful features such as energy saving Set & Forget Sensor Drying and our helpful Bed & Bath Programme. This is useful for drying bulky loads of bedding and towels, leaving you with beautiful soft drying results every time.

ULTIMA

84

Want a vented dryer with useful features such as our Bed & Bath, Woolmark Silver Care and Delicates Programme?

If so, our Aquarius+ model will suit you down to the ground. With its large 7.5kg capacity and range of specialist features, drying your laundry has never been easier, whatever the weather!

AQUARIUS⁺

86

Are you deciding between a vented or condenser dryer that's also simple and easy to use?

With a choice of vented or condenser dryers, a choice of capacity, colour and style, you will be sure to find the right tumble dryer to suit your kitchen design.

AQUARIUS

84

AQUALTIS Tumble Dryers

Completing the Aqualtis family, this distinctive, B energy rated condenser tumble dryer fits in with every lifestyle.

Our ideas. Your home.

The Aqualtis tumble dryer offers more than distinctive style and design, it features a variety of easy to use, specialised drying programmes such as a Jeans Programme, so you can dry your denim garments with confidence, a Refresh Programme and a specially designed Baby Programme. Come rain or shine, Aqualtis makes every day the perfect drying day.

Spin Dryers available Summer 2010

Key features explained...

Condenser Dryers

The ultimate drying convenience, condenser dryers do not need a vent hose so they can be placed anywhere in your home. The internal condensing system collects moisture into an easy empty water bottle at the top of the machine. You don't even have to empty the water at all if you use the mains drain option, which comes as standard on all Hotpoint condenser dryers.

Woolmark Silver Care

Selected Hotpoint tumble dryers feature this special programme endorsed by Woolmark*, the world's leading authority on all wool items. The drum moves in one direction throughout the drying action, which helps to eliminate any friction between the fibres to help keep your clothes in great condition.

*In the UK and Eire the Woolmark is a Certification Trade Mark

Jeans Programme

Available on our Aqualtis tumble dryer, you can now dry your denim garments with confidence; special programming helps maintain the colour, structure and fit of denim based garments and ensures perfect results every time.

Set and Forget Sensor Drying

Our Set and Forget drying system uses sensors to monitor the moisture and temperature levels inside the drum, so that based on the choice of drying level you make (Damp Dry, Iron, Hanger, Cupboard Dry or Ready to Wear), the machine senses when the load is dry. Not only convenient for you, sensor drying ensures maximum energy efficiency, by ensuring that the machine stops when the clothes reach the drying level selected.

Damp Dry

This first level of sensor drying retains a high level of moisture within the clothes, perfect for fabrics such as linen which are notoriously difficult to iron.

Iron Dry

This drying setting leaves a level of moisture within the clothes, helping to make the ironing easier, which is particularly useful for garments such as shirts.

Hanger Dry

Ideal for garments which don't need to be ironed and can simply be placed on a hanger to finish drying.

Cupboard Dry

The drying programme will end when the sensors detect little moisture, meaning the garments are almost completely dry and ready to put away.

Eco Tech

Our Eco Tech icon highlights those tumble dryers with a B energy rating, helping you to save energy at home.

Pre and Post Creasecare

Help prevent creases forming in your laundry by selecting the Pre and/or Post Creasecare option, which will intermittently tumble the load with no heat, particularly useful if you are not available to unload the machine at the end of a cycle.

Refresh Programme

Available on our Aqualtis tumble dryer, a 20 minute cool programme that works on dry clothes to air and refresh them – an alternative to washing items you've only worn once or that have been unpacked from storage.

Bed & Bath Programme

A profile designed with the optimum balance of heat, tumble and cooling phases to ensure that bulky loads of bedding and towels dry evenly, giving perfectly soft drying results every time.

Ready to Wear/ Extra Dry

The highest drying level, this option leaves clothes fully dry and ready to wear immediately.

Please note, Single, Two or Five Level Set and Forget Sensor Drying is available depending upon your choice of machine.

Baby Programme

Available on our Aqualtis tumble dryer a specially designed drying programme with a constant heat profile, set to maintain a small level of moisture in the garments leaving them perfectly soft and gentle against delicate baby skin.

Vented Dryers

Designed to co-ordinate with our washing machine range, Hotpoint vented dryers offer a 7 or 7.5kg load capacity and are full of helpful features like Easy Iron and a useful airing programme.

Brilliant cleaning even at low temperatures with Hotpoint and Ariel Excel Gel

Hotpoint and Ariel have worked in partnership to develop a range of unique energy saving Eco Cycles which are “no-heat” cycles designed to save electricity whilst meeting your everyday cleaning needs.

Ariel Excel Gel is a breakthrough detergent designed from scratch to deliver outstanding cleaning even at low temperatures. Ariel's Actilift™ technology helps release stubborn stains trapped in the cotton fibres of your clothes so dried in stains lift off with ease. Use Ariel Excel Gel Actilift™ with Hotpoint's Eco Cycles and save around 50% to 70% in energy*. *Energy savings are up to 50% for Eco Cotton cycle, up to 68% for Eco Synthetic cycle and up to 70% for Eco Fast Wash cycle (all compared to equivalent 30°C cycle).

†Please note that all graphite appliances do match. However, in certain lights and from different angles, the same colour of adjacent models may appear to differ slightly.

In accordance with its policy of progressive product design and environmental protection, Indesit Company reserves the right to alter specifications and use quality recycled components. To confirm that the specification and / or functions required are still current on the selected model, please call our product information team on 08000 92 19 22 prior to purchase (Alternatively please call 0818 36 50 08 if calling within the Republic of Ireland). Every attempt has been made to ensure an accurate colour representation.

≅ITCL = International Textile Care Labelling standard programmes include 95°C White Cotton & Linen, 60°C Cotton, 50°C Synthetics, 40°C Acrylics, Fast Spin, Slow Spin, Rinse and Spin.

*The Energy Labelling regulations only allow a machine to be labelled up to an A energy rating based on a standard 60°C Cotton Cycle. However new legislation due to be introduced will allow an A+ energy rating to be used where applicable. These models comply with this new standard.

#Duvet Cycle - max load size 3kg, synthetic, feather (duck and goose down), items, wash in special bag provided.

On all front loading machines, we recommend a gap of at least 20mm either side of the machine, for tumble dryers we recommend a 15mm gap either side & 10mm at the top when installing the machine. Always consult handbook for installation details. All optional accessories are available from your retailer or by calling the National Spares number 08448 22 52 25 (If calling within the Republic of Ireland please call 0818 31 34 13) or visit www.hotpointservice.co.uk

For all rear venting tumble dryers a wall (Part No. 9028) or window (Part No. 9029) ventilation kit for permanent installation is available as an optional extra. In accordance with its policy of progressive product design and environmental protection, the company reserves the right to alter specifications and use quality recycled components. Every attempt has been made to ensure an accurate colour representation of the appliances and features illustrated but due to the limitations of the printing process, there may be some slight variations. Full terms and conditions of our After Sales Care are included in the instruction book enclosed with all our appliances. All offers of guarantees and servicing apply to the UK only. For overseas, please contact your local dealer: Hotpoint®, Aqualtis®, Ultima®, Aquarius+® and Aquarius® are Trade Marks of Indesit Company Ltd.

Dishwashing

Do you dream of never having to wash up by hand again? Take a look at our range of full size or slimline dishwashers. All incorporating the latest technology for truly outstanding cleaning performance.

Full Size Dishwashers
102

Slimline Dishwashers
106

Flexipower

Clever cleaning power exactly when you need it.
Our ideas. Your home.

The Flexipower motor on our Ultima dishwashers uses an intelligent sensor system to regulate water pressure and the number of rinses needed. It also adjusts the speed, duration and temperature based on the dirt detected on your dishes! The result? A superb, energy efficient machine that delivers excellent performance.

Flexipower

The specialist Flexipower motor also drives many useful features on our top of the range Ultima dishwashers such as:

Short Time

Short Time significantly reduces the duration of the wash phase whilst still maintaining the optimum washing and drying performance by increasing water pressure.

Extra Silent

Our top of the range Ultima dishwashers are some of the quietest on the market. Extra Silent reduces sound even further by reducing the force of the water pressure inside.

Goodnight

Goodnight quiets everything down even further by reducing the power of the wash and extending the length of the programme - perfect for running in the evening or overnight without disturbing anyone in the house, allowing you to take advantage of cheaper electricity rates.

Intelligent Solutions

Choose a dishwasher with Flexipower for ultimate performance, efficiency and flexibility.

Thanks to the Flexipower intelligent sensor system you can rest assured that your dishwasher will automatically adjust the profile of the wash cycle, depending on the dirt detected on your dishes. So because it only uses the resources it needs – you get high performance with low energy. Thanks to the optimum energy savings it means Flexipower dishwashers are Eco Tech accredited. Look out for the icon on relevant models.

For information on all our other Dishwashing features please see pages 108 & 109.

Dishwashing

Which is the right dishwasher for me?

Want a stylish, efficient dishwasher, packed with the latest features and ultimate performance?

Take a look at our 14 place setting, LCD display, Ultima dishwasher. Complete with a Flexipower motor and intelligent sensor system, the Ultima is also AAA rated and has a range of useful features for maximum flexibility.

ULTIMA
Full Size

102

Are you after complete control and maximum space?

Intelligent Solutions

Whatever the size of your pots, pans and plates, Dual Space gives complete flexibility.

Ever loaded the dishwasher and struggled to get those last few larger items in? With **Dual Space** you won't have this problem again.

This handy feature on selected dishwashers allows you to adjust the height of the top basket in one quick and easy movement, even if you've already fully loaded it. This leaves more room in the lower basket for larger items, and ensures everything gets cleaned properly.

Key features explained...

A range incorporating the latest technology:

Baby Cycle

An intensive wash cycle designed to cleanse and remove harmful bacteria from dishwasher-safe crockery and cutlery used to feed babies and young children, to give you further peace of mind when caring for your family.

14 Place Settings

Cleverly designed upper and lower baskets allow you to wash two extra place settings within the same standard sized dishwasher, with no compromise on cleaning.

Dual Space

The Dual Space system on selected dishwashers allows you to adjust the height of the top basket in one quick and easy movement, even if you've already fully loaded it, which means you can have more room in the lower basket for larger items.

Speed 25

This ultra fast cycle has been developed to wash lightly soiled items in just 25 minutes, leaving you free to get on with more important things.

Eco Wash

An environmentally friendly wash cycle combining low energy consumption levels with great cleaning performance.

Outstanding cleaning performance:

Daily A 60

This wash programme has been designed to wash a typical load of 4-6 lightly soiled place settings within just 60 minutes, whilst achieving an A class wash performance.

Extra Silent

Our top of the range Ultima dishwashers are some of the quietest on the market, at a similar noise level to a quiet conversation.

Duo Wash

The versatile Duo Wash incorporates two washes in one – a gentle wash in the top basket for delicate glasses and china, while an intensive wash takes care of heavily soiled plates, pots and pans in the bottom basket.

Delicate

This Delicate wash programme gives your fragile crystal, china and glassware the care needed, to ensure great cleaning with no damage.

Half Load

Selected dishwashers have a Half Load function for when you only have a few dishes to be washed. Our Ultima range goes one step further, by allowing you to select which basket you want to load, top or bottom. Ideal if the few dishes you have are larger than normal.

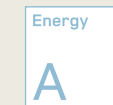

Eco Tech

Our Eco Tech icon highlights dishwashers with our energy efficient Flexipower intelligent sensor system, giving you optimum performance and low energy usage.

AAA

All our dishwashers are AAA rated – A for Wash Performance, A for Energy and A for Drying Performance giving you optimum efficiency everyday.

To ensure the best performance from your dishwasher you need the best detergent. Hotpoint recommends Finish

Use Finish to get amazing results every time you open your Hotpoint dishwasher! Finish have a complete range of products to suit your dishwashing needs, including new Finish QuantuMatic, a refillable detergent dispenser which gives you 12 washes, automatically. A range of enhancers are also available such as Finish Intensive Clean & Care Dishwasher Cleaner which removes grease and limescale to maintain your machine's performance and give you perfect results in every cycle.

Refrigeration

Our appliances keep your food in optimum condition and you can choose from a choice of heights, widths, styles and colours. If you want to create real style in the kitchen take a look at our Quadrio fridge freezer.

US Style Fridge

Freezers
140

Ultimate styling outside... perfect conditions inside! Our refrigeration appliances are designed using the latest technology. Our ideas. Your home.

The fully frost free system on the majority of our fridge freezer range means exactly what it says – no more defrosting ever! And there's more good news, food stays fresher longer due to the circulation of cold air in both the fridge and the freezer preventing the build up of ice and ensuring even cooling throughout.

Fully Frost Free

So how does it work?... Thanks to the circulation of cold air in the freezer compartment and through the air tower in the fridge, ice crystals are unable to form, ensuring there is no build up of ice in the fridge or the freezer meaning that you will never have to defrost again.

Frost Free

Frost Free works in the same way as Fully Frost Free, however the Frost Free system only manages the freezer compartment, not the fridge, ensuring you never have to defrost the freezer again, saving you time and energy.

Flexible control at your fingertips

Besides the automatic Frost Free systems, selected models give you the flexibility to change the temperature of certain areas of the freezer. For instance, if you like your ice cream ready to serve, take a look at the **Cool Care Zone** on our top of the range 60cm wide fridge freezer. This innovative feature gives you a choice of three temperature settings for the top drawer of the freezer so you can select the perfect temperature for ice cream, chilled deserts and spirits.

Intelligent Solutions

Total flexibility with the new Temperature Variable Zone.

Our new Quadrio Fridge Freezer (FF4DTVZ) has an innovative temperature variable zone in the top freezer drawer allowing you to manually set it at various different temperatures between 0°C to -26°C. So if you want to use it as a chiller compartment instead of a freezer compartment you can set it to 0°C, ideal for storing items such as chilled meats and fish.

For more information on all our other Refrigeration features please see pages 146–148.

Refrigeration

Which is the right refrigeration appliance for me?

Do you want to create a style statement in the kitchen whilst also having maximum capacity and innovative storage solutions?

If so, take a look at our US Style Fridge Freezer range, from our unique Quadrio, to our American side by sides and Big 60s and 70s, which have useful storage solutions inside like pizza storage space in the freezer door.

Intelligent Solutions

Innovative storage solutions.

Our Big 70 and Big 60 fridge freezers offer innovative storage solutions such as the handy pizza pocket storage space in the freezer doors and extra deep bottle balcony in the fridge that can hold up to nine 1 litre bottles!

The modern contoured doors also give you up to 35 litres extra capacity on Big 60 models and up to 60 litres extra capacity on our Big 70*.

*Compared to a standard sized fridge freezer.

*Due to the extra depth of the door, installation of the FF7190E in a 70cm width cavity or installation of the FFB6200A or FFB6187 in a 60cm width cavity, particularly against a wall, may be problematic. Please allow up to 10cm additional space for maximum door opening.

• Please note: For information and advice such as whether your appliance is suitable for use in an outbuilding or location other than your kitchen, please call our product information team on 08000 92 19 22 (If calling within Republic of Ireland please call 0818 36 50 08). Please also see the Climate Class definitions on page 151 for further information.

Fridge Freezers

Our fridge freezer range has been designed to accommodate the demands of your busy lifestyle.

Our ideas. Your home.

With flexible storage you can control and stylish looks to complement your kitchen, our fridge freezer range offers something for everyone. Intelligent controls maintain optimum temperatures whilst innovative features like antibacterial protection and Ever Fresh, give you complete peace of mind.

Intelligent Solutions

Efficient appliances for you.

In almost every home it's the refrigeration appliances that are working hard for you 24 hours a day to keep your food in optimum condition. Efficiency is key which is why we have designed our whole refrigeration range to be either as **A** or **A+** energy rated to ensure your appliance is efficient as possible, helping your bank balance and the environment!

Fridges

The perfect storage space for all your fresh food in a modern design that will look great in your kitchen.

Our ideas. Your home.

Available in a choice of heights, widths and colours with a selection of innovative features such as antibacterial protection, spacious salad bins and wine racks, not to mention A and A+ energy ratings, you will be sure to find a fridge that complements your kitchen design whilst keeping your food in optimum condition.

Freezers

Our frost free models prevent the build up of ice, meaning you never have to defrost again.

Our ideas. Your home.

Choose your freezer from a choice of heights, widths and colours. Features such as Big Bin freezer drawers are ideal for getting those larger items in and our Super Freeze option comes in handy after a big shopping session. If you choose a frost free version you can also save time and energy as you will never have to defrost again.

Intelligent
Solutions

Need extra storage space?

Giving you lots of extra capacity our chest freezers are great if you like to stock up on food. With easy access to items, our chest freezers are all A+ energy rated and recommended by the Energy Saving Trust ensuring optimum efficiency. Useful features such as internal lights and Fast Freeze functions also ensure you can find items easily and store them in perfect condition*.

* Please note: For information and advice such as whether your appliance is suitable for use in an outbuilding or location other than your kitchen, please call our product information team on 08000 92 19 22 (If calling within Republic of Ireland please call 0818 36 50 08). Please also see the Climate Class definitions on page 151 for further information.

Key features explained...

Designed for convenience:

Ice Party

Lukewarm wine and frozen bottles stay off the menu with Ice Party. White wine or champagne is quickly chilled to its ideal serving temperature and a discreet signal lets you know when it can be served.

Wine Rack

Use our wine rack to neatly store your wine, allowing air to circulate around ensuring wine is perfectly chilled.

Incorporating the latest technology:

Digital Display

Using the latest technology, this Digital Display puts you in precise control of your fridge freezer programmes and temperature options simply by the touch of a button.

Ever Fresh

An integrated vacuum system ensures food stays fresh longer, without compromising texture and flavour. Simple to use and easy to clean, delivering optimum quality control to your kitchen.

Super Cool and Super Freeze

After a big shopping trip or cooking session, a large number of new items in the fridge or freezer cause the internal temperature to rise. Use Super Cool in the fridge to quickly cool the temperature back to the optimum level. Use Super Freeze in the freezer to quickly freeze fresh food, keeping it as fresh as the day you bought it.

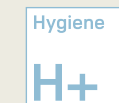

Cool Care Zone

If you like your ice cream ready to serve, this innovative feature gives you a choice of three temperature settings for the top drawer of the freezer so you can select the perfect conditions for ice cream, chilled desserts and spirits.

Antibacterial Protection

Antibacterial Protection is built into our fridge liners giving protection for the life of the product. Working between normal cleanings it inhibits the growth of potentially harmful bacteria and reduces odours.

Ice Care

With common sense and practical design in mind, we have set some of our ice trays neatly into the drawers of the freezer. This gives you easy access to ice cubes and more storage space for your food.

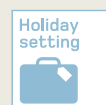

Key features explained...

Intelligent efficiency:

Holiday Setting

Save energy while you are away. Holiday Setting allows the freezer to keep running as normal whilst the fridge is set to 12°C when empty with the door closed.

I Care – Intelligent Refrigeration

The I Care function sets the internal temperature of the fridge to the most optimum energy efficient level dependent on fridge content.

Eco Tech

Our Eco Tech icon is awarded to refrigeration appliances that are both A+ energy rated and fully frost free.

Energy Saving Recommended

All our A+ refrigeration appliances are recommended by the Energy Saving Trust so look out for the logo against relevant appliances.

All Hotpoint refrigeration products are BEAB approved and/or CE marked. All optional accessories are available from your retailer by calling the Hotpoint Spares National Call Number 08448 22 52 25 (If calling within the Republic of Ireland please call 0818 31 34 13) or visiting www.hotpointservice.co.uk. All energy consumption and conservation times quotes for refrigeration are to EN153.

*For the models with a grab handle, the width of the product at the door is 615mm.

†Please note that all Hotpoint Graphite appliances do match. However in certain lights and from different angles the colour of adjacent models may appear to differ slightly.

All under worktop refrigeration: If there is less than a 30mm (1¼”) gap between the top of a refrigeration model and the underside of a worktop, an Air Grille available through your retailer or Hotpoint Spares should be fitted into the back of the worktop to provide adequate ventilation.

In accordance with its policy of progressive product design and environmental protection, Indesit Company reserves the right to alter specifications and use quality recycled components. To confirm that the specification and / or functions required are still current on the selected model, please call our product information team on 08000 92 19 22 (If calling within the Republic of Ireland please call 0818 36 50 08) prior to purchase. Every attempt has been made to ensure an accurate colour representation.

- Please note: For information and advice such as whether your appliance is suitable for use in an outbuilding or location other than your kitchen, please call our product information team on 08000 92 19 22 (If calling within Republic of Ireland please call 0818 36 50 08). Please also see the Climate Class definitions on page 151 for further information.

Our appliance leaving the factory isn't the end of the story for us. We know it's just the beginning of a whole new chapter. Our ideas. Your home.

Quality, at the heart of all we do.

At every stage of the creation of one of our appliances, everyone's job is to always achieve the highest possible quality standards. From the initial design stage, at production and lifestyle testing stages right through to when you give us feedback on your new appliance, quality is always key. It's the quality that guarantees the success of our products and it's this that has shaped our history and a success that we strive to build on every year.

Did you know?

- Hotpoint was one of the first white goods manufacturers to gain ISO 9001: 2008 Quality Control System certification. Internationally recognised, it demonstrates our commitment to service, quality and customer satisfaction.
- All our appliances are tested to simulate up to 10 years of use. For example a typical washing machine test would include:
 30,000 door opening and closing operations
 50,000 interface interactions
 50,000 knob turns
 2,500 dispenser drawer opening and closing operations
 1,250 wash cycles
- We have invested £15m since 2005, an average of £3m per year in quality initiatives.
- Since 2006, our designers have spent 12,000 hours in quality training courses in Research and Development.

Working in Partnership

One of our main aims is to lead the development of new technologies and create energy saving solutions, this enables us to provide you with high performance appliances which use less precious resources.

Part of this development process is working closely with other leading brands...

Ariel

We work closely with Ariel to bring you the best energy saving products and cleaning solutions for your home. It was this partnership that enabled us to jointly develop our unique energy saving Eco Cycles using the cleaning power of Ariel together with our advancement in washing technology, whilst ensuring great cleaning even at low temperatures. Hotpoint recommends using Ariel Excel Gel Actilift™ with our Eco Cycles for the best results.

British Gas

We are constantly working in partnership with British Gas as part of their energy efficiency programme which is committed to helping the environment and reduce CO₂ emissions. British Gas supports Hotpoint and Ariel to help bring you products and solutions that help save you energy and money at home.

Finish

Together with Finish we strive to promote the many benefits of using a dishwasher. These include significant savings in time, water and energy, as well as superior cleaning results compared to washing up by hand. To ensure the best performance from your Hotpoint dishwasher you need the best detergent, and Finish is recommended to give perfect results every time.

We're here if you ever need us... 364 days a year!

Call us 364 days a year

Hotpoint service is second to none. We are open when you need us and our operators are on hand to answer your call every day, except Christmas day, including weekends and bank holidays on **08448 22 42 24** (if calling within the Republic of Ireland please call **0818 31 34 13**). Alternatively book online at www.hotpointservice.co.uk

Appointments to suit you

We do everything possible to fit in with your busy lifestyle. You can choose between morning or afternoon appointments, with the option of the engineer's first or last visit of the day. We will also send you a text message with a 2 hour timeslot on the morning of your appointment. Saturday appointments are also available in some areas.

Local engineers nationwide

We are the largest white goods service team in the United Kingdom & Republic of Ireland with fully trained Hotpoint specialists to ensure you receive fast, reliable and local service.

Professional workmanship – by the experts

Our engineers are professionally trained at the Hotpoint School of Excellence and receive continuous training to ensure they are up-to-date with the latest products. We only fit genuine Hotpoint replacement parts and guarantee our work for a full 90 days.

We're here to help you, call us on

08448 22 42 24

or visit our website www.hotpointservice.co.uk

(if calling from within the Republic of Ireland please call **0818 31 34 13**)

Free parts guarantee

Guaranteed free parts for 5 years

Your Hotpoint appliance is covered for a full 12 months by our own parts and labour warranty. In addition, when you register your appliance we also provide free parts for the first 5 years when fitted by our highly qualified engineers. Please call **08448 24 24 24** for more information (if calling within the Republic of Ireland please call **012 30 02 33**).

Your peace of mind with total protection

We offer a selection of repair protection plans that will enable you to fully cover any number of Hotpoint appliances – after your warranty expires – including new for old product replacement in the event they cannot be repaired. Please call **08448 22 62 26** for more information (if calling within the Republic of Ireland please call **012 30 02 33**).

Satisfaction guaranteed

Within the first 90 days of ownership we have a dedicated team who provide fast track product advice and assistance to deal with your enquiries quickly and efficiently. In the unlikely event that a technical problem occurs that cannot be resolved in this period we will replace your appliance.

Caring for your Hotpoint appliance

We have a wide range of spare parts and accessories as well as an array of Professional Home Care cleaning products specially designed for your Hotpoint appliance to keep it in showroom condition and hygienically clean throughout its life.

Fridge Care Spray

A professional, no rinse cleaning spray with an antibacterial action that removes grease and disinfects all internal surfaces.
Code: C00089777

Ceramic Hob Care (500ml Spray)

Rapidly dissolves all build-up and other residue on glass ceramic hobs leaving it in showroom condition.
Code: C00089782

Deep Cleansing Oven Care (500ml Spray)

Dissolves grease and grime build up, without scrubbing to professionally deep clean your oven.
Code: C00089772

Limescale & Detergent Remover

Suitable for Washing Machines*/Washer Dryers and Dishwashers

Protects your appliance from the harmful effects of limescale build up and hygienically cleans all internal components as well as eliminating bad odours.
Code: C00090908

*Not suitable for Top Loading Washing Machines.

For more information, or to order please call **08448 22 52 25** (if calling within the Republic of Ireland please call **0818 31 34 13**).

You can now buy online at www.hotpointservice.co.uk

We have been busy creating
